

Redstone Engineering with Minecraft Virtual Camp

Do you have a 3rd - 6th grade youth at home that loves playing Minecraft? Wish they could also learn basics of computer science and design engineering?

Our Redstone Minecraft virtual learning class is offering its first session for 3-weeks, for youth in grades 3rd through 6th, who are familiar with Minecraft. Campers dive into the deep world of engineering and design through Redstone tools in Minecraft. Participants gain a better understanding of Minecraft Redstone and how it relates in-real-life (IRL) to computer science. Campers interact with peers and learn cool new techniques to design and create contraptions in their own Minecraft worlds. Sign up your youth today!

Participants enjoy a unique gamified learning experience and develop and practice new skills such as:

- Critical Thinking
- Problem Solving
- Math Skills
- Creative Expression
- Social/Emotional Learning
- Basic Circuitry
