Redstone Minecraft Engineering Virtual Camp - DAVIS

Do you have a 3rd - 6th grade youth at home that loves playing Minecraft? Wish they could also learn basics of computer science and design engineering?

Our Redstone Minecraft virtual learning session 1 class is starting Tuesday April 6, 2021 and lasts for 3-weeks for youth in grades 3rd through 6th. Campers dive into the deep world of engineering and design by utilizing Redstone tools in Minecraft. Participants gain a better understanding of Minecraft Redstone and how it relates in-real-life (IRL) to computer science. Jr. Engineers interact with peers and learn cool new techniques to design and create contraptions in their own Minecraft worlds. Sign up today!

Participants enjoy a unique gamified learning experience and develop and practice new skills such as:

- Critical Thinking
- Problem Solving
- Math Skills
- Creative Expression
- Social/Emotional Learning
- Basic Circuitry
